Summary

Passionate Software Engineer specializing in web applications development with more than ten years of experience in the industry. Feel great commitment to software quality. I would not like to return miles of code lines back when investing in quality. Developed several systems for business process automation. As an OpenSource user, I've been coding using PHP and JavaScript frameworks. I have experience in requirements management, analysis, design, implementation, and software testing. I feel passionate about the development guided by good practices and design/architecture patterns. Enthusiastic about applying and sharing knowledge with a team to achieve a shared goal. Enjoys constant innovation. Promotes development of reusable subsystems. Love working in a friendly team, collaborative environment that develops high-quality level software with professionalism.

Main Skills

Symfony	Software Development Methodologies (SCRUM, RUP)
